61 WARREN STREET, COR. COLLEGE PLACE.

(Formerly Jersey City, N. J.)

New York, April 4th 1889

Mr Daniel W. Foss

Supt. U.S. Mint Phila. Pa.

Dear Sir:

Referring to a recent interview I had with you in reference to our new Coin Scale, I beg to ask if you would kindly entertain a proposition, by either allowing us to exhibit one of these scales, or sending one, on trial.

We are positive that it would prove of great service in testing and adjusting Gold Coin very rapidly and accurately, with our new appliance, as will be seen by several of the opinions attached to enclosed circular.

Trusting a favorably reply

I Remain

Yours Very Respectfully
Herman Kohlbusch.

New York
April 4. 1889.

Herman Kohlbusch.

Asks permission to exhibit
new Coin Scale.

— ESTABLISHED 1860. —

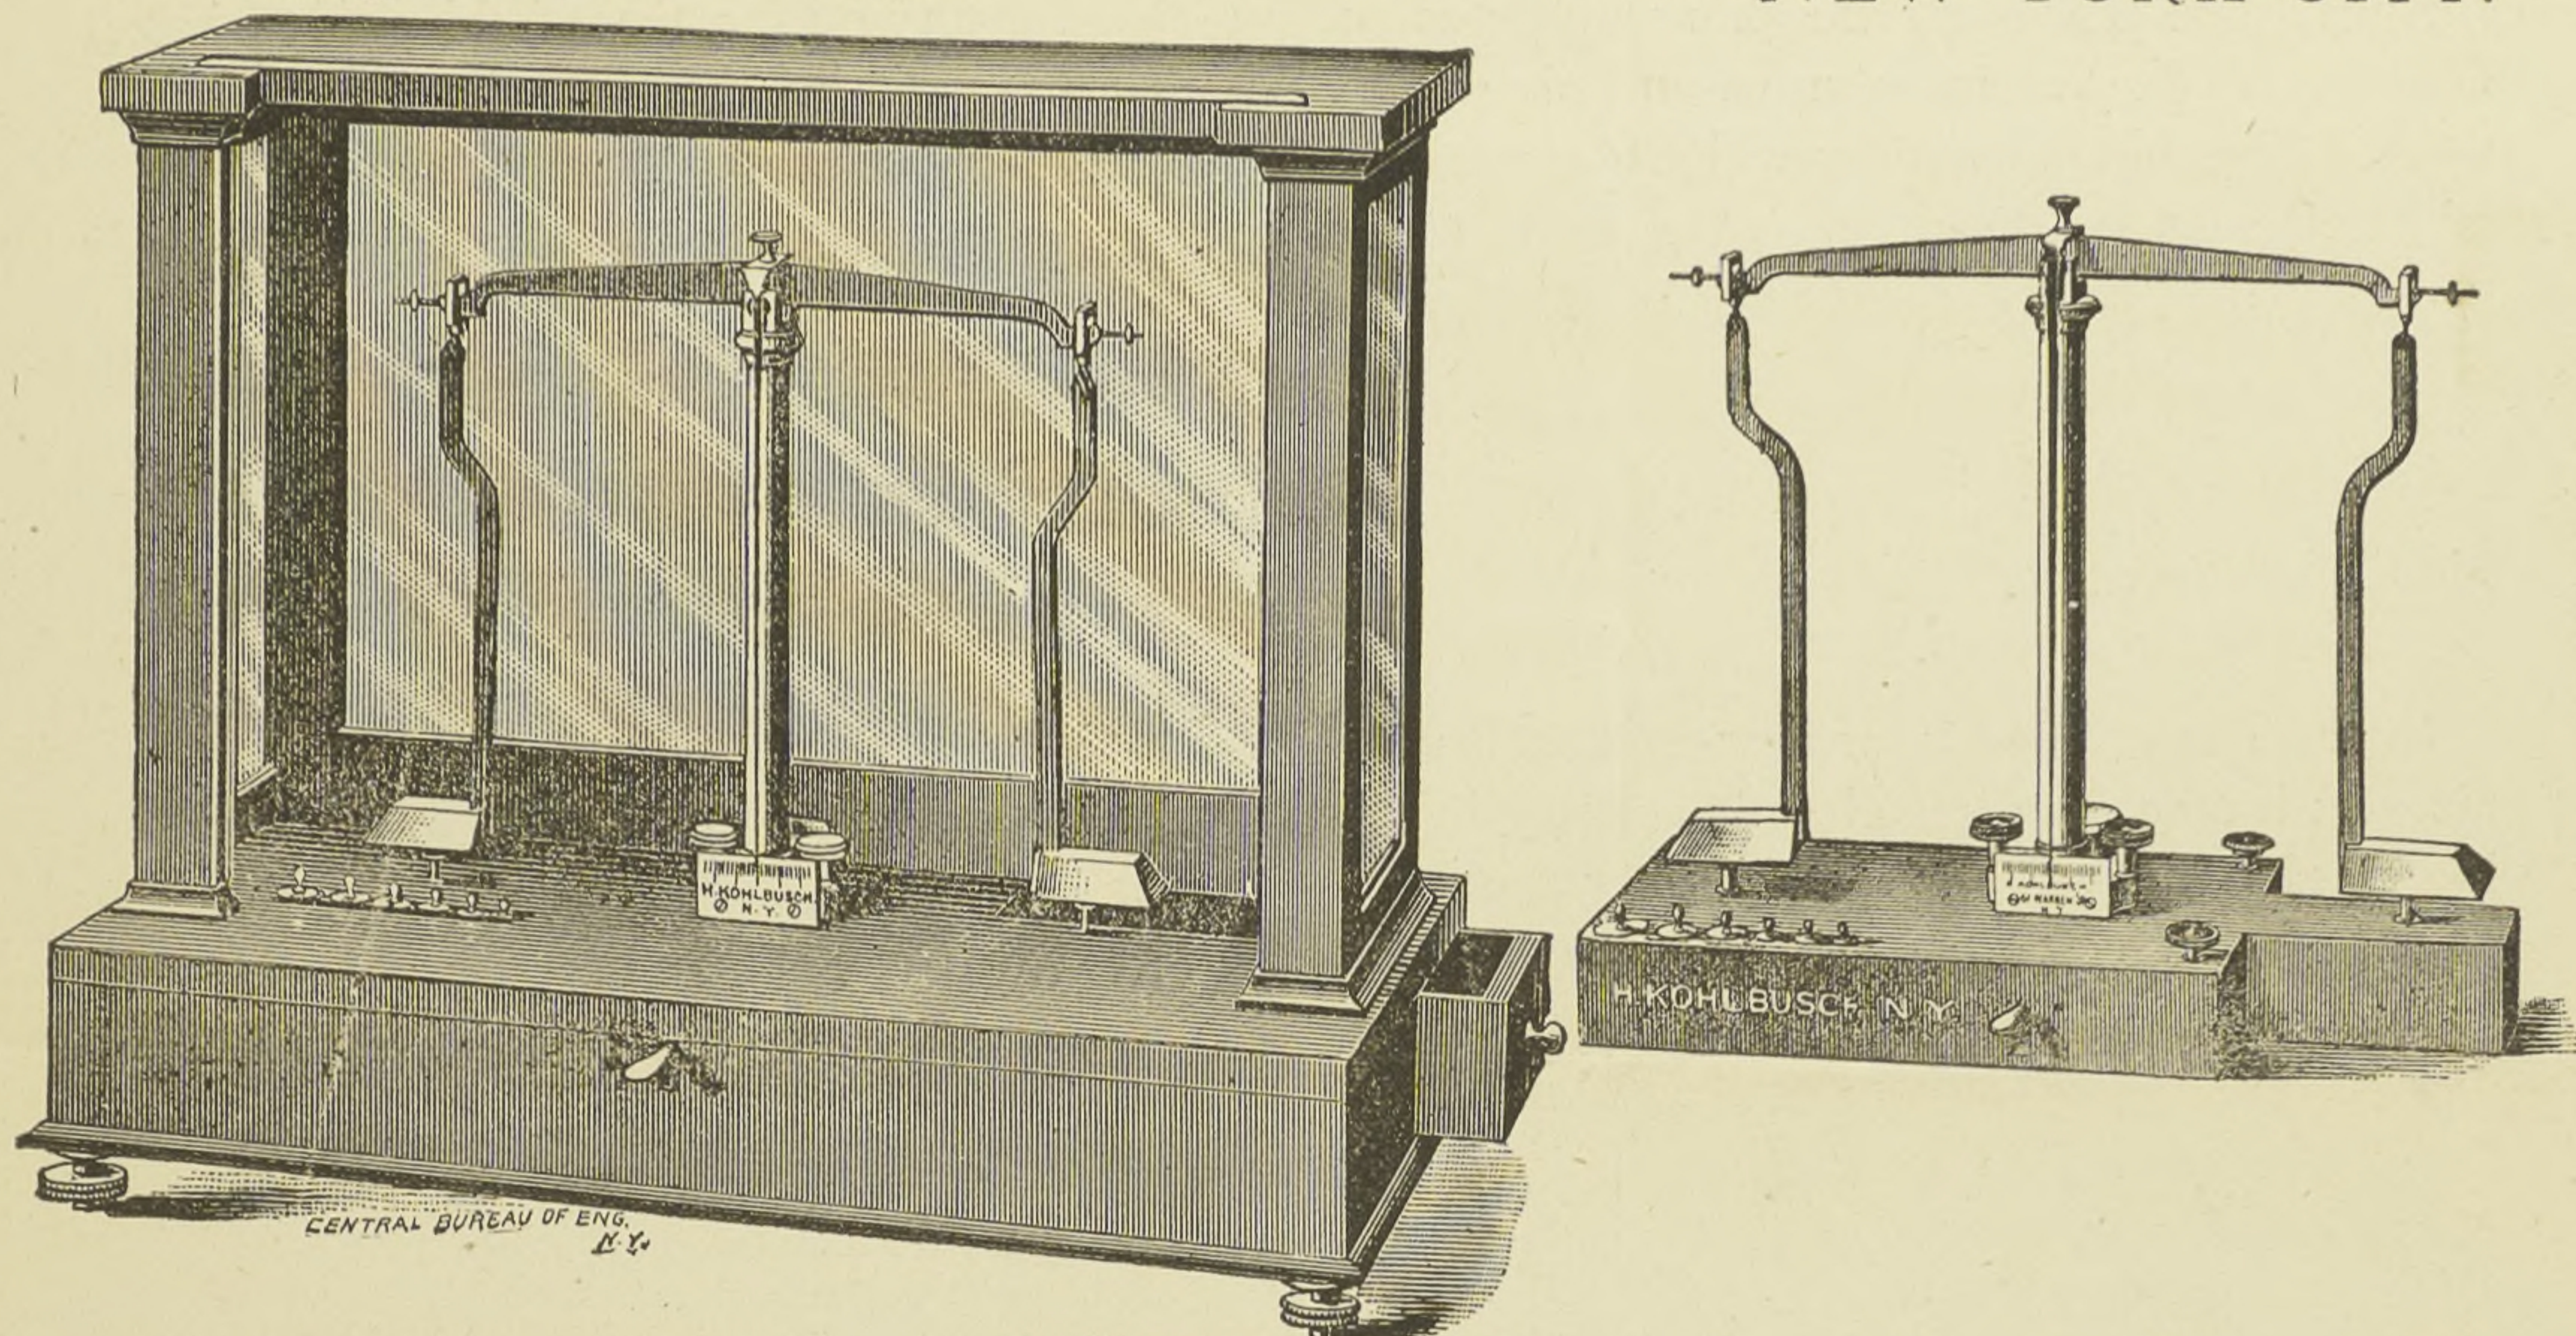

HERMAN KOHLBUSCH,

MANUFACTURER OF

FINE ♦ BALANCES ♦ AND ♦ WEIGHTS.

SCALES AND WEIGHTS OF EVERY DESCRIPTION.

Office, Showroom, and Works, 61 Warren Street,
Cor. College Place. NEW YORK CITY.

The above cuts represent my new Gold-Coin Scale in glass case and on base, for weighing single pieces of coin.

Having heard numerous complaints against the old style coin scales, caused us to study the defects, and this new scale is the result. It stands without an equal, as every defect has been overcome, and the mechanism is faultless and durable.

The Scale is a new departure from former principles entirely; the beam being stationery, the bows are hung to same by stirrups with drop-pins underneath the pans which are attached to the lever; a slight pressure on the lever is, therefore, only necessary to put the scale in instant motion. This avoids all swinging of beam and coin-pans, for the simple reason that the Scale needs no lifting—which makes weighing on the old style so uncertain, and a coin needs the to be tested several times to get a correct result. By this Improved Scale, all this is avoided result being shown immediately.

Since first bringing our new Coin Scale to public notice, we have invented a novel and useful glass-case for same, which is made of best seasoned polished mahogany and is constructed in such manner that the scale can be as easily manipulated as if it were on base, and keeping it free of dust. Further we have left an orifice in the back of the weighing pan, so that the coin can be tipped off, falling through this into a drawer, as shown in cut.

The Scales are furnished with screw feet and spirit level, so that they can be set level on any table, and include a full set of gold-coin weights, from \$20 down to \$1, least current value, neatly set in base of Scale (as shown in cut) handy for use. Foreign weights set in without extra cost.

It is also admirably adapted for Banks. For Bullion Balances send for Catalogue.

These scales are now in use in most of the U. S. Treasuries and a number of banks, giving the greatest satisfaction as shown by the numerous testimonials received, several of which we attach.

Price of Scale complete with weights on base, - - - - - \$30.00

In improved glass-case, " " " " - - - - - \$45.00

This Circular cancels former one sent out.

(over)

OFFICE OF ASSISTANT TREASURER, U. S.
New York City, May 1st, 1888.

MR. H. KOHLBUSH,
61 Warren Street, New York, N. Y.

SIR: The Scales for weighing single coins, purchased from you for use of this office, have been in use for several months, and give general satisfaction to the money counters who use them. The new device by which the pans are held stationery during weighing, is particularly advantageous for the rapid and accurate testing of large quantities of coin,

Respectfully, PHILIP D. GULAGER.
Chief of Coin Division.

OFFICE OF THE ASSISTANT TREASURER, U. S.
Baltimore, Sept. 15th, '88.

MR. H. KOHLBUSH,
New York.

SIR: I have used your new coin scales in this office for several months, with great satisfaction; it combines speed and accuracy in weighing, and is decidedly the best scale for weighing single pieces of coin I have ever used.

Respectfully, GEORGE W. BISHOP,
Assistant Treasurer, U. S.

OFFICE OF THE ASSISTANT TREASURER, U. S.
St. Louis, Mo., Sept. 15th, '88

MR. KOHLBUSCH,
New York City.

After testing the merits of your Coin Scale thoroughly, I consider them superior to any that have been used in this office.

C. F. SCHULTZ,
Assistant Treasurer, U. S.

CONTINENTAL BANK,
St Louis, Mo., Sept. 15th, '88.

MR. KOHLBUSCH,
61 Warren St., N Y. City.

DEAR SIR: It gives great pleasure to state that the new Coin Scale recently purchased from you gives us great satisfaction, and supplies to us a long felt want

Yours truly, GEO. A. BAKER, President.

CUSTOM HOUSE, NEW YORK CITY,
Collector's Office, Sept. 19th, '88.

HERMAN KOHLBUSCH ESQ.,

DEAR SIR: We have in use in this office one of your new Coin Scales in improved Glass-Case. I am glad to be able to say to you that it gives us great satisfaction.

Yours Respectfully, C. H. TAYLOR,
Cashier Custom House.

[Enclosed circular:]
[See original images for drawings of scales.]

Established 1860.
Herman Kohlbusch,
Manufacturer of Fine Balances and Weights. Scales and weights of every description.
Office, Showroom, and Works, 61 Warren Street,
New York City.

The above cuts represent my new Gold-Coin Scale in glass case and on base, for weighing single pieces of coin.

Having heard numerous complaints against the old style coin scales, caused us to study the defects, and this new scale is the result. It stands without an equal, as every defect has been overcome, and the mechanism is faultless and durable.

The Scale is a new departure from former principles entirely; the beam being stationery, the bows are hung to same by stirrups with drop-pins underneath the pans which are attached to

the lever; a slight pressure on the lever is, therefore, only necessary to put the scale in instant motion. This avoids all swinging of beam and coin-pans, for the simple reason that the Scale needs no lifting – which makes weighing on the old style so uncertain, and a coin needs the to be tested several times to get a correct result. By this Improved Scale, all this is avoided result being shown immediately.

Since first bring our new Coin Scale to public notice, we have invented a novel and useful glass-case for same, which is made of best seasoned polished mahogany and is constructed in such manner that the scale an be as easily manipulated as if it were on base, and keeping it free of dust. Further we have left an orifice in the back of the weighing pan, so that the coin can be tipped off, falling through this into a drawer, as shown in cut.

The Scales are furnished with screw feet and spirit level, so that they can be set level on any table, and include a full set of gold-coin weights, from \$20 down to \$1, least current value, neatly set in base of Scale (as shown in cut) handy for use. Foreign weights set in with-out extra cost.

It is also admirably adapted for Banks. For Bullion Balances send for Catalogue.

These scales are now in use in most of the U.S. Treasuries and a number of banks, giving the greatest satisfaction as shown by the numerous testimonials received, several of which we attach.
